Model LMB24-SR

Proportional Control

Torque min. 45 in-lb for control of damper surfaces up to 11 sq ft.

Models
- LMB24-SR
- LMB24-SR-T
- LMB24-SR-T.1 (bulk)
- LMB24-SR.1 (bulk)

Application
For proportional modulation of dampers in HVAC systems. Actuator sizing should be done in accordance with the damper manufacturer’s specifications.

The actuator is mounted directly to a damper shaft from 1/4” up to 5/8” in diameter by means of its universal clamp. Shafts up to 3/4” diameter can be accommodated by an accessory clamp.

The actuator operates in response to a 2 to 10 VDC, or with the addition of a 500 kΩ resistor, a 4 to 20 mA control input from an electronic controller or positioner. A 2 to 10 VDC feedback signal is provided for position indication or master-slave applications.

Operation
The actuator is not provided with and does not require any limit switches, but is electronically protected against overload. The anti-rotation strap supplied with the actuator will prevent lateral movement.

The LMB series provides 95° of rotation and a visual indicator indicates position of the actuator. When reaching the damper or actuator end position, the actuator automatically stops.

The gears can be manually disengaged with a button on the actuator cover.

The LMB24-SR... actuators use a sensorless Brushless DC motor, which is controlled by an Application Specific Integrated Circuit (ASIC). The ASIC monitors and controls the actuator’s rotation and provides a digital rotation sensing (DRS) function to prevent damage to the actuator in a stall condition. Power consumption is reduced in holding mode.

Add on auxiliary switches or feedback potentiometers are easily fastened directly onto the actuator body for signaling and switching functions.

Dimensions (Inches [mm])

- 1/4" to 3/4" [6 to 20]
- 5/16" to 3/4" [8 to 26]

- 0.86" [22]
- 3.7" [94]
- 2" [50.8]

Technical Data LMB24-SR(-T)

- **Power Supply**: 24 VAC ± 20% 50/60 Hz
- **Power Consumption**: 1.5 W (0.4 W)
- **Transformer Sizing**: 3 VA (Class 2 power source)
- **Electrical Connection**: 3 ft, 18 GA plenum rated cable
  - 1/2" conduit connector
  - Protected NEMA 2 (IP54)
- **Overload Protection**: electronic throughout 0 to 95° rotation
- **Operating Range**: 2 to 10 VDC, 4 to 20 mA
- **Input Impedance**: 100 kΩ (0.1 mA), 500 Ω
- **Feedback Output U**: 2 to 10 VDC (max 0.5 mA)
- **Angle of Rotation**: max. 95°, adjust. with mechanical stop
- **Torque**: 45 in-lb [5 Nm]
- **Direction of Rotation**: reversible with ∨ switch
  - CCW with decreasing control signal (10 to 2V)
  - CW with decreasing control signal (10 to 2V)

Position Indication: reflective visual indicator (snap-on)

Manual Override: external push button

Running Time: 95 seconds, constant independent of load

Humidity: 5 to 95% RH non-condensing (EN 60730-1)

Ambient Temperature: -22°F to 122°F [-30°C to 50°C]

Storage Temperature: -40°F to 176°F [-40°C to 80°C]

Housing Material: UL94-5VA

Agency Listings†: cULus acc. to UL 60730-1A-2-14, CAN/CSA E60730-1-02, CE acc. to 2004/108/EEC and 2006/95/EC

Noise Level: <35dB(A)

Servicing: maintenance free

Quality Standard: ISO 9001

Weight: 1.7 lbs [0.5 Kg]

LMB24-SR-T

- **Electrical connection**: screw terminal (for 26 to 14 GA wire)
- **Housing**: NEMA 2/IP20

†Rated Impulse Voltage 800V, Type of action 1, Control Pollution Degree 3.
**Typical Specification**

Proportional control damper actuators shall be electronic direct-coupled type, which require no crankarm and linkage and be capable of direct mounting to a shaft from 1/4" to 5/8". Shafts up to 3/4" diameter can be accommodate with an accessory clamp. Actuators must provide proportional damper control in response to a 2 to 10 VDC or, with the addition of a 500 Ω resistor, a 4 to 20 mA control input from an electronic controller or positioner. Actuators shall have Brushless DC motor technology and be protected from overload at all angles of rotation. Actuators shall have reversing switch and manual override on the cover. If required, actuator will be provided with screw terminal strip for electrical connections (LMB24-SR-T). Run time shall be constant and independent of torque. A 2 to 10 VDC feedback signal shall be provided for position indication. Actuators shall be cULus listed, have a 5-year warranty, and be manufactured under ISO 9001 International Quality Control Standards. Actuators shall be as manufactured by Belimo.

**Wiring Diagram**

**INSTALLATION NOTES**

1. Provide overload protection and disconnect as required.
2. **CAUTION** Equipment damage!
   - Actuators may be connected in parallel.
   - Power consumption and input impedance must be observed.
   - Actuators may also be powered by 24 VDC.
3. Only connect common to neg. (-) leg of control circuits.

**APPLICATION NOTES**

- The ZG-R01 500 Ω resistor converts the 4 to 20 mA control signal to 2 to 10 VDC, up to 2 actuators may be connected in parallel.

**WARNING Live Electrical Components!**

During installation, testing, servicing and troubleshooting of this product, it maybe necessary to work with live electrical components. Have a qualified licensed electrician or other individual who has been properly trained in handling live electrical components perform these tasks. Failure to follow all electrical safety precautions when exposed to live electrical components could result in death or serious injury.
